

Lighthouse is an innovative software platform used by professionals to identify victims of exploitation, coordinate their care, and understand trends in human trafficking.

Lighthouse for Screening

Screen with CSE-IT to identify trafficking victims. Understand local trends and vulnerabilities.

Lighthouse for Data

Understand the statewide landscape of human trafficking. Use data to help coordinate care and improve outcomes for survivors.

Which platform(s) should I use?

Do you or does your organization:	Lighthouse for Screening	Lighthouse for Data
Directly serve vulnerable populations, and need a tool to identify individuals who may be exploited?	Screen with CSE-IT	
Coordinate care for presumed or confirmed trafficking victims?		Report care coordination measures, and analyze trends and outcomes
Want to understand local trafficking vulnerabilities and trends?	Visualize client screenings, demographics and indicators	
Want to understand human trafficking at a regional or statewide level?		Visualize aggregate data and trends
Evaluate or advise on policies, programs, and outcomes related to human trafficking?		Improve insights and take informed action to better serve survivors
